HANOI UNIVERSITY OF SCIENCE AND TECHNOLOGY

ONE LOVE. ONE FUTURE.

# NET ZERO 05 COMMITMENT

OUR 05 ACTIONS TO BECOME CARBON NEUTRAL  
Updated from  
Commitment to Energy Efficiency  
ver. 04 Jan 2022

1

## Maximize capacity of buildings

---

We plan our campus buildings and facilities into blocks of teaching, research and administration. Academic schedules are devised to maximize the number of building users per day to minimize energy use per person.

2

## Save energy

---

Lighting, air-conditioning and equipment are only on when in use. Reminders are put near the entrances.

3

## Use energy efficiently

---

Changing our fluorescent lighting system to more efficient LED lights

4

## Carbon offsets

---

We plant trees and flowers around the campus to reduce greenhouse gases emissions into the air.

5

## Eco-Design

---

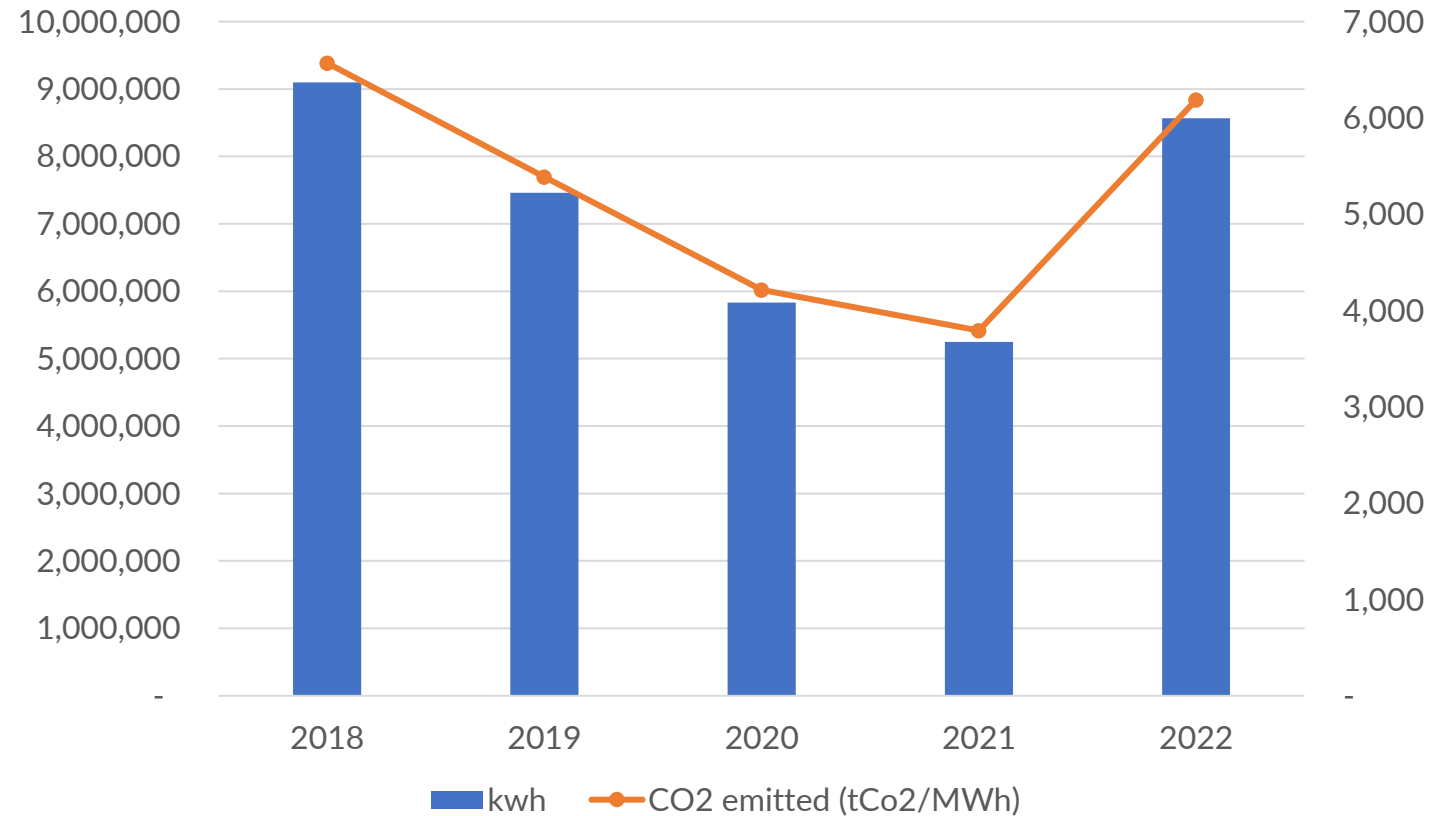

New buildings are designed and equipped towards less energy requirements.

# Our targets and progress in 2023

**Scopes 1&2**  
**By 2050**

**Scope 3**  
**Collecting data**  
**Tentative by 2060**

## Scope 1 emissions 2018-2022

**HUST**
