

BRIEF DESCRIPTION OF THE SURVEY

(Evaluation of the current training program – For graduate students)

1. Objectives

The objectives of this survey is to take feedback of graduate students who graduated since 2014 about the two major training programs offered by SEE: The Electrical Engineering Program and the Control and Automation Engineering program. The surveys serve as input for SEE and HUST to improve the program curriculum, quality of service, etc.

This survey is performed by the SEE. Similar surveys are carried out by the Office of Students Affairs for all graduate students, with a broader range of questions.

2. Respondents

Graduate students from promotion 54 to promotion 58. 190 students answered this survey.

3. Methodology

The survey was created using Google form. It was broadcast to students via SEE website, Facebook fanpage, and email addresses of graduate students.

4. Key findings

- The program provide students with good knowledge and skills to fulfill their workplace job.
- Most students find job which closely relate to their program. Half of respondents find no difficulty applying for job.
- The assistance from University and SEE in student study and career orientation receives good feedback
- Most students think that the program should improve the balance between theory and practice. More experimental activities are needed

QUESTIONNAIRE SURVEY FOR NEW GRADUATES

Dear newly graduated students,

Congratulations on your completion of the University training program and officially receiving your Diploma Hanoi University of Technology!

School of Electrical Engineering, Hanoi University, Hanoi University of Technology is implementing a project to review, evaluate and take measures to improve the quality of training to meet the needs of technical human resources in the field of Control & Automation, Electrical Engineering in particular and Electricity industry in general.

We take your opinions very seriously, refer and consider them in improving training programs as well as quality of engineers and bachelors graduate in order to meet the increasing demand of the labor market.

Survey results will be presented in the form of statistical data. We would like to guarantee the information you provide will be completely confidential and used for the right purpose mentioned above.

Thank you for your cooperation.

A. Personal Information

1. Full Name

2. Class

3. Phone Number

4. Email

5. Course Code

6. Year of Graduation

7. Field of Education

Control and Automation

Electrical Engineering

8. Specialized Education Area

Automatic Control

Industrial Automation

Instrumentation and Industrial Informatics

Electric Power System

Electrical and Electronics Equipment

9. Graduation Grade

Excellent

Very Good

Good

Average

10. CPA accumulation points upon graduation

11. Language Level at graduation. Please specify what certificate? (TOEIC, TOEFL, IELTS ...) and scores) (Eg: TOEIC: 450)

B. Information on Current Status

1. Describe your current employment situation

- Job closely match the program of study
- Job does not match the program of study
- Studying a different field
- Pursuing graduate study
- Job quite matches the program, actually studying new field
- Working and studying at the same time
- Unemployed

2. Your employment potential/career potential in the near future

- Good
- Fair
- Very good
- Bad

3. What difficulty you have had applying for jobs

- Professional knowledge and skill not adequate
- Don't have information about employers
- Foreign language skill not adequate
- No difficulty at all
- Lack of practical skill

4. What advantages you had when applying

- The HUST brand name
- Good skills
- Training program adequately provide skills and knowledge

5. General knowledge and skills in the program

- Good
- Fair
- Very good

- Bad

6. The laboratory facilities and duration of experimental activities

- Good
- Fair
- Very good
- Bad

7. How the program helps you develop soft skills

- Good
- Fair
- Very good
- Bad

8. How the program helps you with analytical thinking and critical thinking

- Good
- Fair
- Very good
- Bad

9. How is the ability to apply theory into practice

- Good
- Fair
- Very good
- Bad

10. How the program helps you in doing independent research

- Good
- Fair
- Very good
- Bad

11. The program curriculum is suitable for students

- Good
- Fair
- Very good
- Bad
- Very bad

12. The program has a balance between theory and practice

- Good
- Fair
- Very good
- Bad
- Very bad

13. Laboratory and experimental activities are adequate

- Good

- Fair
- Very good
- Bad
- Very bad

14. Students receive support for course materials, scientific research

- Good
- Fair
- Very good
- Bad
- Very bad

15. Students are assisted with career orientation

- Good
- Fair
- Very good
- Bad
- Very bad

16. Students acquired skills and knowledge in the future workplace during their study

- Good
- Fair
- Very good
- Bad
- Very bad

17. Students receive orientation and guides about personal values, career orientation and personal growth

- Good
- Fair
- Very good
- Bad
- Very bad

18. Which software do you find necessary for your current employment

- Matlab & Simulink, NX, CATIA, phần mềm thiết kế 3D, 2D
- Autocad, Matlab & Simulink
- Autocad, Matlab & Simulink, PLC (Siemens, Mitsubishi, Omron, Rockwell Automation,....)
- Autocad, PLC (Siemens, Mitsubishi, Omron, Rockwell Automation,....)
- Autocad, Pss/E, microsoft office, balmorel

19. Other Opinions

Please click the Submit button to finish the Survey Form.

Thank you for your cooperation!

1. Describe your current employment situation

2. Your employment potential/career potential in the near future

3. What difficulty you have had applying for jobs

4. What advantages you had when applying

General knowledge and skills in the program

The laboratory facilities and duration of experimental activities

How the program helps you develop soft skills

How the program helps you with analytical thinking and critical thinking

How is the ability to apply theory into practice

How the program helps you in doing independent research

6.1. The program curriculum is suitable for students

6.2. The program has a balance between theory and practice

6.3. Laboratory and experimental activities are adequate

6.4. Students receive support for course materials, scientific research

6.5. Students are assisted with career orientation

6.6. Students acquired skills and knowledge in the future workplace during their study

6.7. Students receive orientation and guides about personal values, career orientation and personal growth

Graduation Grade

7. Which software do you find neccessar for your current employment

BRIEF DESCRIPTION OF THE SURVEY

(Evaluation of the current training program – For students who are studying)

1. Objectives

The objectives of this survey is to take feedback of students who pursuing the EE and CEA programs in SEE. The surveys serve as input for SEE and HUST to improve the program curriculum, quality of service, etc.

This survey is performed by the SEE.

2. Respondents

Students from promotion 62 to promotion 59. 147 students answered this survey.

3. Methodology

The survey was created using Google form. It was broadcast to students via SEE website, Facebook fanpage, and email addresses of graduate students.

4. Key findings

- The students are informed about the training programs, via various communication channels. Course contents are relevant to the learning outcome
- Students receive good support in doing research
- Most students are satisfied with the examination procedures and assessment results.
- Classroom facilities are adequate
- Students are satisfied with the Academic management and the use of information technologies in communicating about semester timeline, course registration and assessment results
- In general, students are satisfied with the support service (SEE office, library, dormitory)
- Study program need to further improve students English proficiency

Survey Form of Student on the Program

Dear students,

Congratulations on your completion of the University training program and officially receiving your Diploma Hanoi University of Technology!

School of Electrical Engineering, Hanoi University, Hanoi University of Technology is implementing a project to review, evaluate and take measures to improve the quality of training to meet the needs of technical human resources in the field of Control & Automation, Electrical Engineering in particular and Electricity industry in general.

We take your opinions very seriously, refer and consider them in improving training programs as well as quality of engineers and bachelors graduate in order to meet the increasing demand of the labor market.

Survey results will be presented in the form of statistical data. We would like to guarantee the information you provide will be completely confidential and used for the right purpose mentioned above.

- ☐ Mục khác: _____

12. 3. Please evaluate the program's teaching and learning methods according to the following criteria: **Chỉ đánh dấu một hình ôvan cho mỗi hàng.*

	Least	Average	good	Very good
The teaching and learning methods encourage student in scientific research	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Your opinion about: Students receive strong support in doing research	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Your opinion about: Teaching and experimental activities complement each other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

13. **4. Please rate the content of the program according to the following criteria: ****Chỉ đánh dấu một hình ôvan cho mỗi hàng.*

	Least	Average	good	very good
Course content match the course objectives	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The up-to-date degree of the course content	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Relevance of course content to the program learning outcomes	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Your opinion about the inter-disciplinary aspect of the program curriculum	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

14. **5. Are you informed about the procedures of examination, assessment methods and the appeal procedures? ****Chỉ đánh dấu một hình ôvan.*

- ☐ Don't know
- ☐ Unsure
- ☐ Know very well

15. **6. Are you satisfied with the exam regulation, assessment results and appeal result (if applicable) ****Chỉ đánh dấu một hình ôvan.*

	1	2	3	4	5	
Strongly Unsatisfied	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Very satisfied

16. **7. Are you satisfied with the advice received about your training program ****Chỉ đánh dấu một hình ôvan.*

	1	2	3	4	5	
Strongly unsatisfied	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Very satisfied

17. 8. Please evaluate the quality of the classroom / lecture hall according to the following criteria: **Chỉ đánh dấu một hình ôvan cho mỗi hàng.*

	Least	Average	Good	Very good
Opinion about the classroom hygiene	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Your opinion about how the classroom size match the number of students enrolled	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Your opinion: Class tables and chair suitable for stuying purpose	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Quality of classroom tables and chairs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Quality of projectors and screen in the classrooms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Quality of the lighting system and speakers in the classrooms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Quality of the chalkboard, plastic boards	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Quality of air conditioning system and air ventilation system	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
General assessment of the quality of classrooms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

18. 9. Please evaluate the quality of the laboratory / computer response according to the following criteria: **Chỉ đánh dấu một hình ôvan cho mỗi hàng.*

	least	average	Good	Very good
Quality of support service of computer labs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The number of lab computers adequately matches the number of students	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lab computers meet the requirement of study	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Quality of computers/experimental devices	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
General asssestment of the computer and experimental labs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

19. 10. Please evaluate the academic management of the Department and SEE, according to the following criteria: **Chỉ đánh dấu một hình ôvan cho mỗi hàng.*

	Least	Average	Good	Very good
Performance of the class monitors	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Academic management system of the Department	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Management of the School of Electrical Engineering	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Application of Information technology in communicating with students about course timeline, assessment results, course registrations, etc.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
How often the departments and the school ask for your feedback	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

20. **11. Please evaluate extracurricular activities to support students according to the following criteria: ***

Chỉ đánh dấu một hình ôvan cho mỗi hàng.

	Lest	Average	Good	Very good
Extracurricular activities: scientific competition, seminars	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Quality of scientific seminars for students	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Your ability to receive information on job offers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

BRIEF DESCRIPTION OF THE SURVEY

(Industry feedback on the Expected Learning outcomes for the new training programs)

1. Objectives

The objectives of this survey is to take feedback of industry partners who are also prospective employers on the revised Program Learning Outcomes. This survey serves as input for the Curriculum Design team to determine the society needs regarding the students knowledge and skills.

This survey is performed by the SEE.

2. Respondents

Industry partner from various sectors were invited to the workshop, organized on 13 July 2017. 32 companies and organization answered.

3. Methodology

This is a paper based survey. It was later digitalized for analysis.

4. Key findings

- All respondents agree with the new majors in EE that are introduced by SEE, namely “power systems”, “renewable energy”, and “industrial and commercial power systems”
- Most respondents have high demand on the learner skills. On the Bloom’s taxonomy scale, most respondents require that students have ability to synthesize in all aspect (disciplinary knowledge, personal skills, interpersonal skills, conceiving-designing-implementing in the enterprise-social-environmental context).
- Also, during the discussion (see also Evidence EE 10.02.02 in the SAR), most respondents are more used to the Engineer degree of the 4+1 program. SEE and HUST need to communicate more about the new training model which focuses on the Bachelor degree and the Master degree.

QUESTIONNAIRE SURVEY ON OUTCOME STANDARDS

To whom it may concerned,

Your survey feedback will contribute to building up the training program of the School of Electrical Engineering, with the aim of meeting your requests when using the human resources trained by our School.

Survey results will be presented in the form of statistical data. We would like to guarantee the information you provide will be completely confidential and used for the right purpose mentioned above.

Thank you for your cooperation.

***Obligatory**

A. PERSONAL INFORMATION

5. Full Name

6. Phone number

7. Email

8. Enterprise/Organization

9. Are you an alumnus of Hanoi University of Science and Technology?

Only tick one answer

Yes

No

10. Number of years you are on working?

Only tick one answer

0-5 years

5-10 years

10-15 years

More than 15 years

11. How many Alumni of School of Electrical Engineering are working in your business?

Only tick one answer

Less than 5 people

From 5-10 people

From 10-20 people

More than 20 people

B. COMMENTS ON THE AREAS OF TRAINING PROGRAM

We intend to open different areas of training program according to the following directions:

11. Your opinion is on which area of training:

Only tick one answer

Electrical Engineering – refer to question 13

Control and Automation - refer to question 15

Orientations of the area of Electrical Engineering

Please read the description of each orientation before you continue the survey.

ELECTRIC POWER SYSTEM

After graduating, the learner has a solid foundation in basic math and science and a competent level of foreign language to participate in international integration, have in-depth knowledge of production and transmission systems, power distribution in order to be able to plan, design, and operate power transmission systems and power plants and substations in the most reliable, safe, quality and economical method.

Intensive blocks of knowledge:

- Power transmission grid
- The electric market
- Power plants and substations
- Protect and control electric systems
- Planning power source and grid
- Operate the power system
- Managing power demand
- Distributed power sources connected to the power transmission system

ELECTRICAL AND ELECTRONICS EQUIPMENT

After graduating, the learner will have

- Firm knowledge base to adapt well to different jobs in the field of electrical engineering, such as: designing, manufacturing, operating, maintaining, consulting and installing industrial and civil electrical equipment, power supply, industrial and civil lighting.
- Skills of knowledge discovery, problem solving, systematic thinking and personal and professional qualities career
- Social communication skills needed to work effectively in a multidisciplinary team and in an international environment
- Capacity to design, build, manufacture systems / products / technical solutions in the field of research, manufacture and use of electrical equipment in the economic, social and political context

Intensive blocks of knowledge

- Implementation of calculating and designing electrical equipment

- Implementation of calculating and designing control devices
- Industrial and civil lighting engineering
- Industrial maintenance

INDUSTRIAL AND CIVIL ELECTRIC SYSTEMS

After graduating, the learner has a solid foundation in basic math and science and a competent level of foreign language to participate in international integration, have in-depth knowledge of medium-voltage and low-voltage equipment and systems in order to be able to design, manage and operate industrial and civil power supply systems in the most reliable, safe, quality and economical method.

Intensive blocks of knowledge

- Power distribution grid
- Electric safety
- Power reliability and quality
- Managing load and power demands
- Distributed power sources
- Industrial power supply systems
- Power supply systems for buildings

NEW AND RENEWABLE ENERGY

After graduating, the learner has a solid foundation in basic math and science and a competent level of foreign language to participate in international integration, have in-depth knowledge of renewable energy sources in order to be able to design, manage and operate renewable energy sources effectively, reliably and economically.

Intensive blocks of knowledge

- Wind power
- Solar power
- Biomass and geothermal power
- Energy storage and modification equipment
- Integrating new and renewable energy sources in transmission and distribution networks
- Energy policies
- Financial analysis of renewable energy projects

13. Practical level of orientations of the area of Electrical Engineering

Only tick one answer for each row

Very practical

Practical

Not practical

Electric Power System

Electrical and Electronics Equipment

Industrial and Civil Electric System

Orientations of the area of Control and Automation

At the bachelor's degree, students in the area of Control and Automation are able to operate or maintain industrial automation systems. Up to engineer and master level, students can choose intensive or multidisciplinary area as follows:

Please read the description of each orientation before you continue the survey.

INDUSTRIAL AUTOMATION

After graduating, learners are able to apply scientific and managing principles in forming and building an Automation system that meets the aggregate requirements of a system in industry such as optimizing operability, combining human resources with investment in modern machinery and equipment. Based on scientific thinking, learners are able to design systems that meet the requirements for control, energy saving, balance between goals of reducing equipment investment costs and system operating costs. Learners are capable of consulting, supervising and owning projects in building an automation system

Intensive blocks of knowledge:

- Integrate automation system
- Electric drive control
- Power electronics
- Robot technology
- Digital control system
- Simulation of production systems

AUTOMATION OF ELECTRIC POWER SYSTEM

After graduating from school, learners are able to apply scientific principles, management principles in formulating and building automation systems that meet the general requirements of a system such as optimizing operability, combining human resources with investment in modern machinery, technology and saving energy.

Intensive blocks of knowledge:

- Integrate automation system
- Electric power system (grid, protection)
- Electric drive control

- Power electronics
- Digital control system
- System simulation

INSTRUMENTATION AND INDUSTRIAL INFORMATICS

After graduating, the learner has a solid foundation in basic math and science and a competent level of foreign language to participate in international integration, have in-depth knowledge of sensors, measurement techniques in order to be able to design, install, evaluate, operate and maintain industrial measurement equipment and systems. Learners are capable of participating in activities related to standards and calibration. In addition, students can participate in the simulation process, study the characteristics of new types of sensor.

Intensive blocks of knowledge:

- Measuring and designing measuring equipment
- Signal and algorithm processing
- Sensor
- Micro system
- Measuring device in biomedical engineering
- Environment measuring equipment
- Electronic measuring device
- Standards and national measurement assurance systems

INDUSTRIAL COMPUTING

After graduating, the learners will have a solid foundation in basic math and science and a competent level of foreign language to participate in international integration, have in-depth knowledge of measurement, automatic control, industrial communication network, wireless sensor network, embedded system in order to be able to design, install, operate, maintain monitoring and data-collecting equipment and systems. Learners are also capable of participating in activities related to designing software for fault diagnosis, industrial systems, and production management.

Intensive blocks of knowledge:

- Computer networks, Internet, industrial networks
- Supervisory Control And Data Acquisition (SCADA)
- Wireless sensor network
- Embedded System
- Neural networks and applications in signal processing

- Digital control system
- Production management system
- Human-Computer Interface
- IoT basic

CONTROL TECHNIQUES AND APPLICATIONS

After graduating, learners will have:

- Professional ethics, health and ability to implement independent research and team working, as well as communicate and present specialized issues.
- Ability to understand, operate, analyze and correct devices, control automation systems in a variety industrial areas, defense-security, construction, transportation, health and civil.
- Ability to design, execute, transfer automatic production lines, automatic control system in industry, including various types of process control systems, hydraulic and compressed air systems, robot as well as industrial monitoring and control systems using computers, PLCs.
- Equipped with knowledge of automatic control theory from basic to modern to be able to implement independent research, as well as being able to join groups of researching and developing high technologies that can be applied into real life.

Intensive blocks of knowledge:

- Advanced control theory
- Optimization and optimal control
- Control system design
- Digital control system
- Design of embedded control system
- Controlling electromechanical systems
- Artificial intelligence and application (AI and Applications)
- Network control system
- Computer Vision
- Motion control
- Process control
- Control renewable energy

13. Practical level of orientations of the area of Control and Automation

Only tick one answer for each row

Very practical
 Practical
 Not practical

Industrial Automation
Automation of Electric Power System
Instrumentation and Industrial Informatics
Industrial Computing
Control Techniques and Applications

14. Other comments on orientations of the area of Control and Automation

EVALUATE THE OUTCOME STANDARD

The assessment of the output standard is divided into 4 contents: (1) Knowledge and Ability of Making Arguments; (2) Personal Professional Quality; (3) Teamwork Skills; (4) Professional Competence

1. Knowledge and Ability of Making Arguments

17. 1.1 Ability to apply basic maths, physics, informatics knowledge to describe, calculate and simulate technical systems, processes and products related to technical applications of the area of Electrical Engineering

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

18.1.2 Ability to apply knowledge of circuit, electronics, control techniques, measurement and automation to analyze technical problems, products and equipment related to applications of the area of Electrical Engineering

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze

Able to summarize

Able to evaluate

Master of science

Master of engineering

Engineer

Bachelor of engineering

Bachelor of industry

19.1.3 Ability to apply knowledge of application-oriented domains, combined with possibilities using modern calculation methods and tools to participate in designing and evaluating solutions, production lines and technical products in the field of application

Only tick one answer for each row

Knowledgeable at a limited level

Knowledgeable/able to participate

Able to apply

Able to analyze

Able to summarize

Able to evaluate

Master of science

Master of engineering

Engineer

Bachelor of engineering

Bachelor of industry

2. Personal Professional Quality

20.2.1 Ability to analyze and solve technical problems

Only tick one answer for each row

Knowledgeable at a limited level

Knowledgeable/able to participate

Able to apply

Able to analyze

Able to summarize

Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

21.2.2 Ability to design and implement experiments, research, and ability to analyze results

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

22.2.3 System thinking and critical thinking

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

23.2.4 Personal skills to succeed in technical practices: proactive, flexible, creative, able to explore and manage time

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

24.2.5 Understanding of professional ethics, intellectual property

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

25.2.6 Understanding of management, including trade regulations, society, legal framework in the area of electrical engineering

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering

Engineer
Bachelor of engineering
Bachelor of industry

26.2.7 Understanding contemporary issues and lifelong awareness

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

3. Teamwork Skill

27.3.1 Skills of organization, leadership and teamwork, in a multidisciplinary working environment

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

28.3.2 Effective communication skills in writing, presentations and discussions, using electronics and media means

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

29.3.3 Skills to use English effectively at work

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

4. Professional Competence

30.4.1 Capacity to identify problems and formulate ideas for technical solutions, participate in building projects that are related to economic, social and environmental factors in the globalized world

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze

Able to summarize

Able to evaluate

Master of science

Master of engineering

Engineer

Bachelor of engineering

Bachelor of industry

31.4.2 The capacity to participate in designing systems, processes, products and offering technical solutions related to the area of electrical engineering

Only tick one answer for each row

Knowledgeable at a limited level

Knowledgeable/able to participate

Able to apply

Able to analyze

Able to summarize

Able to evaluate

Master of science

Master of engineering

Engineer

Bachelor of engineering

Bachelor of industry

32.4.3 Capacity to participate in implementing, manufacturing and deploying systems, products and technical solutions related to the area of electrical engineering

Only tick one answer for each row

Knowledgeable at a limited level

Knowledgeable/able to participate

Able to apply

Able to analyze

Able to summarize

Able to evaluate

Master of science

Master of engineering

Engineer

Bachelor of engineering
Bachelor of industry

33.4.4 Ability to operate, use and exploit systems, processes and products related to application area

Only tick one answer for each row

Knowledgeable at a limited level
Knowledgeable/able to participate
Able to apply
Able to analyze
Able to summarize
Able to evaluate

Master of science
Master of engineering
Engineer
Bachelor of engineering
Bachelor of industry

Working experience

How many employees of your company are from SEE

On what branch of study are you giving feedback

How necessary is the Power System major

4.3 IMPLEMENTING ENGINEERING SOLUTION

4.4 OPERATING ENGINEERING SYSTEMS

BRIEF DESCRIPTION OF THE SURVEY

(Students survey on the courses they have taken in the last semester)

1. Objectives

The objectives of this survey is to take feedback of students about various aspects of the courses that they have taken. This study is carried out at the end of every semester.

This survey is performed by the Academic Office of HUST. The survey results are afterwards extracted and sent to institutions in charge of the courses.

2. Respondents

This brief presents results of the survey for 20181 semester. 635 courses were surveyed. All students must fill the survey form.

3. Methodology

Student need to fill this online survey after each semester. The Academic Office send the survey results to the Heads of School.

4. Key findings

- Most students give positive feedback about: course importance and relevance, teaching and pedagogical skills, lecturers' ethics.
- Question 4 receives feedbacks with the least variation. Most students are satisfied with the quality of lectures and personal guide sessions.
- There are a few courses that receive some negative feedback on Question 1 (importance), Question 4 (Quality of lecture). SEE will gathered feedback on this courses in other semester and take action if the responses are consistent.

Survey : Course evaluation

Carried out by the Academic Office after each semester

Question 1. How do you rate the importance of this course in the training program

- a. Very important
- b. Important
- c. Quite important
- d. Not important
- e. Don't know

Question 2. Teaching methods, including lectures, online content, project, experiments and excercises are well designed and effective?

- a. Very effective
- b. Effective
- c. Adequate
- d. Not adequate
- e. Very inadequate

Question 3. Are you adequately explained and guided to perform the self study, decide the learning methods and course materials

- a. Very good
- b. Good
- c. Fair
- d. Not good
- e. Very bad

Question 4. How do you rate the quality of lecture and guides, including in-class lecture and personal guide sessions if applicable

- a. Very good
- b. Good
- c. Fair
- d. Not good
- e. Very bad

Question 5. How do you rate the lecturer's pedagogical skills, his/her ability to use technologies in the lecture which enhance the learning efficiency

- a. Very good
- b. Good
- c. Fair
- d. Not good
- e. Very bad

Question 6. How much time do you spend on self-study, compared to the lecturing time?

- a. ≥ 2 times
- b. ≥ 1.5 times
- c. ≥ 1 times
- d. ≥ 0.5 times
- e. < 0.5 times

Question 7. How do you rate your motivation to learn this course, compared to other courses?

- a. Very high motivation
- b. Higher motivation
- c. About the same
- d. Worse
- e. Very bad

Question 8. Class attendance: According to you, what is the rate of class attendance, in percentage of the total number of registered students

- a. $\geq 90\%$
- b. $\geq 80\%$
- c. $\geq 70\%$
- d. $\geq 60\%$
- e. $< 60\%$

Question 9. Lecturer's ethics. How do you feel about the lecturer ethics, responsibility and fairness

- a. Exemplary
- b. Good
- c. Fair
- d. Not good
- e. Not acceptable

Question 10. Punctuality. Rate the lecturer punctuality

- a. Very good
- b. Good
- c. Fair
- d. Not good

- e. Not acceptable

Question 11. Personal progress. Are you satisfied with your progress, in comparison with your effort and expectation

- a. Very satisfied
- b. Satisfied
- c. Fair
- d. Not satisfied
- e. Very disappointed

Question 12. Exam and test: How do you rate the test methods (its relevance to the course outline and expected outcome)

- a. Very good
- b. Good
- c. Fair
- d. Not good
- e. Inadequate

Question 13. Overall assessment. Are you satisfied with the quality and effectiveness of this course (or perhaps you could have learnt the course entirely yourself)

- a. Very satisfied
- b. Satisfied
- c. Fair
- d. Not satisfied
- e. Very disappointed

Question 14. B-Learning: Do you agree that one part or all of this course content can be made online?

- a. Completely agree
- b. Agree
- c. Whatever
- d. Not very agreed
- e. I don't agree

Question 1. How do you rate the importance of this course in the training program

Chart Title

Question 2. Teaching methods, including lectures, online content, project, experiments and excercises are well designed and effective?

Question 3. Are you adequately explained and guided to perform the self study, decide the learning methods and course materials

- a. Very good
- b. Good
- c. Fair
- d. Not good
- e. Very bad

Question 4. How do you rate the quality of lecture and guides, including in-class lecture and personal guide sessions if applicable

Question 5. How do you rate the lecturer’s pedagogical skills, his/her ability to use technologies in the lecture which enhance the learning efficiency

Question 6. How much time do you spend on self-study, compared to the lecturing time?

Question 7. How do you rate your motivation to learn this course, compared to other courses?

Chart Title

Question 8. Class attendance: According to you, what is the rate of class attendance, in percentage of the total number of registered students

Question 9. Lecturer’s ethics. How do you feel about the lecturer ethics, responsibility and fairness

Question 10. Punctuality. Rate the lecturer punctuality

Question 11. Personal progress. Are you satisfied with your progress, in comparison with your effort and expectation

Question 12. Exam and test: How do you rate the test methods (its relevance to the course outline and expected outcome)

Question 13. Overall assessment. Are you satisfied with the quality and effectiveness of this course (or perhaps you could have learnt the course entirely yourself)

Question 14. B-Learning: Do you agree that one part or all of this course content can be made online?

CLASSROOM OBSERVATION FORM

Faculty/School:.....

Type of classroom observation

Announced: ☐

Unannounced: ☐

I. Information of Staff:

Name : Academic title: Department:
